Glossary . . . 9

Approval 9

1. Context and Motivation

[Describe the field and the practical need behind this project in 2–3 short paragraphs.]

Platform. **[Main hardware / software / data the project is built on.]**

2. Problem and Project Idea

Problem Statement

[State the problem in 2–4 sentences: what must be built or investigated, for whom, and what makes it non-trivial.]

[Explain the idea of the solution and the main components.]

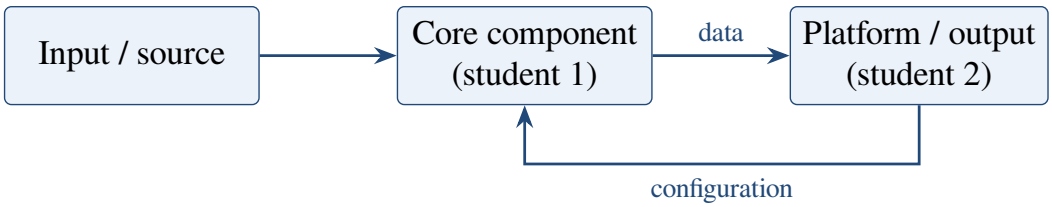

Figure 2.1: High-level architecture of the system (replace).

As shown in Figure 2.1, **[walk the reader through the flow]**.

3. Goals and Expected Outcomes

3.1 Project goals

1. **[Goal 1 — verb + object + measurable target]**
2. **[Goal 2]**
3. **[Goal 3]**

3.2 Learning outcomes

On completing the project the student will be able to:

- **[outcome 1 — a skill, not a topic (e.g. "verify an RTL module with a self-checking testbench")]**
- **[outcome 2]**

4. Scope, MVP and Constraints

4.1 Minimum viable result (MVP)

- **[MVP item 1]**
- **[MVP item 2]**

4.2 Out of scope

- **[explicitly excluded item (can become an extension, ch. 13)]**

4.3 Constraints and assumptions

- **[available equipment / software licences / data]**
- **[key assumption]**

5. Technical Description

5.1 Components

[Describe each component and its responsibility.]

5.2 Interfaces and data

[Describe interfaces, protocols and data formats. Use a table for parameters / registers.]

Table 5.1: Example parameter table (replace).

Parameter	Range	Note
[name]	[range]	[note]

5.3 Starting point

[Existing code, reference designs, lab materials the student receives on day one.]

6. Roles and Tasks

6.1 Student

Individual topic: ***[the title of this student's own diploma]***

T1.1 **[task]**

T1.2 **[task]**

T1.3 (optional) **[stretch task]**

Key Point

[What this student's diploma is mainly about — the focus for the examiners.]

7. Learning Path

7.1 Prerequisites

The student is expected to already have:

- **[prerequisite 1 (course name)]** — *self-check:* **[how to verify / what to revise]**
- **[prerequisite 2]**

7.2 What to learn

Aware — knows what it is and when it is used; Understand — can explain it and read existing work; Apply — can use it independently to build.

Table 7.1: Knowledge map — Student.

Topic	Level	Where it is used in the project	Resources
[Group 1, e.g. Fundamentals]			
[topic]	Apply	**[where it is used]**	[B1], **[ch.]**
[topic]	Understand	**[where it is used]**	[W1]
[Group 2, e.g. Platform and tools]			
[topic]	Aware	**[where it is used]**	[A1]

7.3 Tools and skills

- **[Tool] — [what it is used for; version; where to get a licence]**

8. Getting Started

8.1 First meeting checklist

- **[repository / shared folder access]**
- **[lab / equipment access, safety briefing]**
- **[communication channel and meeting slot]**

8.2 Environment setup

1. **[install tool X (version), licence instructions]**
2. **[build and run the reference example]**

8.3 Warm-up exercises

Warm-up exercise 1: [Exercise title] Est. time: **[6 h]**

[What to do, in 2–4 sentences, with links to the needed resources.]

Done when: [observable acceptance condition, e.g. "simulation shows …"]

Warm-up exercise 2: [Exercise title] Est. time: **[8 h]**

[Second exercise that builds on the first and is a small piece of the real project.]

Done when: [acceptance condition]

8.4 Read first

[The 2–3 resources to start with, in order.]

9. Work Plan and Milestones

Table 9.1: Work plan and checkpoints.

Weeks	Phase / milestone	Checkpoint result
1–3	Onboarding: setup, reading, warm-up exercises (ch. 8)	Warm-up exercises accepted
4–6	**[Design / specification]**	**[design document or reviewed diagram]**
7–14	**[Implementation, increment 1 (MVP core)]**	**[demo of …]**
15–20	**[Implementation, increment 2]**	**[…]**
21–24	**[Integration, testing, evaluation]**	**[test report / measurements]**
25–28	Writing the diploma document	Full draft to supervisor
29–30	Defense preparation	Slides, demo rehearsal

Note

Regular meetings: **[frequency]**. A short written progress note (what was done, what is blocked, next steps) is sent before each meeting.

10. Deliverables

Table 10.1: Project deliverables.

Deliverable	Form	Due	Responsible
Source code / design files	Git repository with README and build instructions	**[week]**	Student
[Test and measurement results]	**[report section + raw data]**	**[week]**	**[who]**
Diploma document	PDF (diploma-project template)	**[date]**	Student
Defense presentation and demo	Slides + live demo or video	**[date]**	Student

11. Assessment and Acceptance Criteria

11.1 Acceptance criteria

The project is accepted for defense when:

- the MVP (Chapter 4) works and is demonstrated;
- **[criterion]**

11.2 Assessment rubric

Table 11.1: Assessment rubric.

Criterion	Weight	Minimum (pass)	Good	Excellent
Technical result	35%	MVP works	MVP + measured performance	**[MVP + extension, clean design]**
Verification and testing	20%	**[…]**	**[…]**	**[…]**
Understanding and analysis	15%	**[…]**	**[…]**	**[…]**
Independence and work process	10%	**[…]**	**[…]**	**[…]**
Document and presentation	20%	**[…]**	**[…]**	**[…]**

12. Final Demonstration

1. **[The user starts …]**
2. **[The system shows …]**
3. **[A fault / change is introduced and the system reacts …]**

13. Extensions (Optional)

The following items are **not required**; they can raise the grade or become a follow-up project.

- **[extension]**

14. Supervision, Collaboration and Risks

14.1 Supervision

- **Supervisor: [role, meeting frequency, contact]**
- **Industry mentor: [role of the industry mentor, if any]**
- **Tools for collaboration: [repository, chat, shared folder]**

14.2 Risks

Table 14.1: Main risks and mitigation.

Risk	Impact	Mitigation
[e.g. equipment not available on time]	[medium]	[plan B, e.g. simulation first]
[e.g. learning curve of tool X]	[high]	[warm-up exercises, mentor sessions]

15. Weekly Progress Tracker

Tick the box when the week's planned work is done, and write a short note (or the supervisor's initials) at the weekly meeting. Task numbers refer to Chapter 6.

Table 15.1: Weekly progress tracker.

Week	Planned work (tasks)	Checkpoint result	✓	Notes / initials
Onboarding				
1	Tools installed; warm-up 1	**[checkpoint]**	☐	
2	**[planned work]**	**[checkpoint]**	☐	
[next phase]				
3	**[T1.1 …]**	**[checkpoint]**	☐

Glossary

project brief the document that defines a student project: goals, scope, learning path, tasks, plan, deliverables and assessment.

Approval

This brief defines the scope of the project. Changes to goals, scope or deliverables are agreed with the supervisor(s) and recorded as a new version.
